SYNTHETIC SURGICAL INDICATOR UNDERGLOVE

# Biogel PI UltraTouch S Indicator Underglove

Biogel PI UltraTouch S Indicator Underglove is a skin-friendly, blue surgical underglove ~~that reduces the risk of dermatitis~~ <sup>①</sup>.

Biogel PI UltraTouch S Indicator Underglove

Biogel® PI UltraTouch® S Indicator® Underglove is ~~a skin-friendly, blue surgical underglove that reduces the risk of dermatitis~~. It is made from synthetic polyisoprene excluding chemical accelerators known to cause contact dermatitis, such as Thiazoles, Thiurams, Carbamates, Thioureas and Diphenylguanidine **1**. It is also manufactured without CPC (Cetylpyridinium Chloride). It can be used with the Biogel PI UltraTouch S overglove to create a coloured Puncture Indication System, proven to provide the **fastest** and **largest** puncture indication available **2,3**

- Manufactured without chemical accelerators known to cause contact dermatitis **1**
- ~~Reduced risk of Type IV allergic contact dermatitis~~ **1**
- Best-in-Class puncture detection **2,3**
- Reduced risk of a hole with an industry-leading AQL\*\* of 0.65, determined post packaging **4**
- Every glove (100%) is air-inflation tested for holes typically not detected in a visual inspection **5**
- Low endotoxin level (<20 EU/pair), which may reduce the risk of post-operative complications **4,6**

\* Thiazoles, Thiurams, Carbamates, Thioureas and Diphenylguanidine

\*\* AQL = Acceptable Quality Level refers to the maximum number of defective products that could be considered acceptable during the random sampling of an inspection, in this case freedom from holes in gloves.
